

APPLICATION RECOMMENDATIONS

- Small particle size offers application flexibility, even on greens height turf
- Great for trouble dry spots, sod, bunker banks, drain lines, or anywhere a spot soil surfactant application is desired
- Simply rotary or drop spread, and water-in with a typical overnight irrigation cycle

SMS 700G APPLICATION RECOMMENDATIONS

- Apply at 6.5 pounds per 1000 square feet for up to 90-day performance
- Best performance is achieved when 700G is applied as a preventative application
- Whenever possible, apply on dry turf to avoid the product sticking to wet turfgrass leaves and ensure soil contact
- Lower rates for shorter-term control can be used

SUGGESTED SMS 700G SPREADER SETTINGS

Spreader Model	Pounds/1000 sq. ft.	Setting	Spread Width
Anderson's Model 2000 Rotary Spreader	6.5	M	9'
Lesco Commercial Plus Rotary Spreader	6.5	16	9'

Settings can vary among the same model of spreader. We recommend that you calibrate your spreader before use. While we encourage the use of drop spreaders for applications of SMS 700G, due to inconsistencies in spreader performance, we cannot provide drop spreader settings. Please calibrate or cross-reference existing drop spreader settings for an accurate application.
