

### What is SMS Active Plus™?

Active Plus is a unique multi-component blend of adjuvant technology designed to enhance the performance of both contact and systemic fungicides and lengthen disease control, even when applied in reduced carrier volumes. SMS Active plus will also enhance the performance of plant growth regulators. Field research with SMS Active Plus has proven the quality and performance of this new chemical blend.

**Directions for Use:** Apply SMS Active Plus at 1 pint (16 fluid ounces) per 100 gallons of water, or 0.125% V/V of spray solution. Consult product label for complete application directions.

### SMS Active Plus Key Benefits

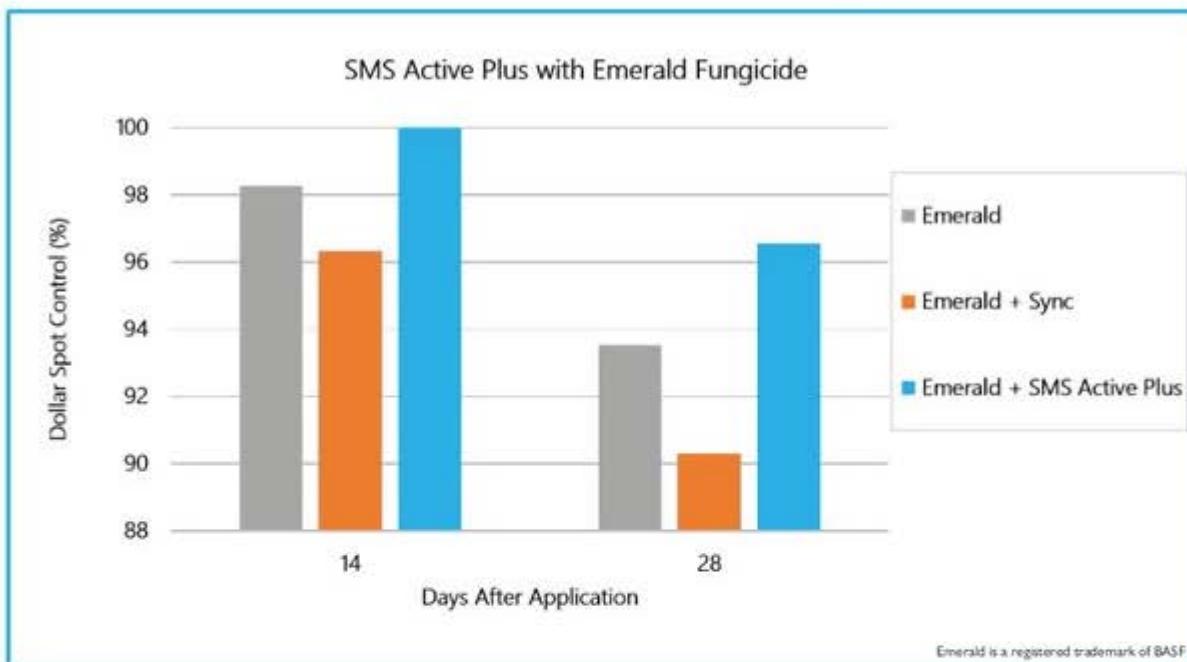

- Increases the performance of contact fungicides by maximizing spray coverage on leaf surfaces
- Maximizes the viability of the active ingredient in fungicides or plant growth regulators
- Enhances the ability of systemic fungicides or plant growth regulators to penetrate waxy cuticles found on leaf blades
- Maximizes translocation of systemic fungicides and plant growth regulators
- Increases residual activity of fungicide and plant growth regulator performance
- Allows for reduced spray volumes, without sacrificing performance of fungicides or plant growth regulators
